Education

DIT UNIVERSITY

Bachelors of Computer Science

(Specialization in Data Science and Analytics)

Dehradun, Uttarakhand

2023-Pursuing | CGPA-8.00

Skills

- **Languages:** Java, Python, C, SQL, HTML, CSS
- **Libraries & Frameworks:** TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Streamlit, Gradio, Java Swing
- **Tools:** MySQL, Git, GitHub, Linux, VS Code
- **Concepts:** Machine Learning, Deep Learning, Transfer Learning, CNNs, CRUD Operations, File Handling, Relational Database Design, ACID Principles
- **Interpersonal:** Adaptability, Communication, Team Management, Critical Thinking, Problem Solving Abilities

Projects

Fake vs Real Image Detection

- CNN-based fake image detector using Transfer Learning (EfficientNetB4, ResNet50, Xception) with AUC-weighted ensembling, achieving 90.5% accuracy (0.97 AUC-ROC) on ~3,000 test images.
- This application is built using Python, PyTorch, timm, Gradio.
- Upload an image to get an instant FAKE or REAL prediction (90.5% accuracy) via Gradio.

Smart Recommender System

- The system recommends **courses, movies, books** by analyzing item descriptions in real time via Streamlit.
- This application is built using **Python, Streamlit, Pandas, NumPy**.

Address Book Application

- Developed a Java Swing Address Book application with CRUD and search functionality.
- Implemented persistent contact storage using Java File Handling.
- Built a desktop contact management system using Java, Swing, and File Handling.

Experience

Celebal Technologies Private Limited

15 June, 2026 – Present.

- **Project Development & Technical Skills:** Built multiple end-to-end machine learning pipelines across regression, time-series forecasting, clustering, and deep learning, applying Python, scikit-learn, XGBoost, LightGBM, and TensorFlow/Keras to solve real-world datasets.
- **Practical Application:** Bridged academic ML theory with applied data science — improving regression model performance through feature engineering, and building customer segmentation and classification systems using clustering and ensemble methods.
- **Leadership & Problem-Solving:** Served as Student Representative for the cohort while independently tackling progressively complex weekly assignments, breaking tasks into structured components and meeting deadlines through consistent debugging and validation.

OLF OPTO Electronics

16 June, 2025 – 16 July, 2025

- **Project Development & Technical Skills:** Built a file-based data storage and manipulation system using Java, strengthening core programming and problem-solving abilities.
- **Practical Application:** Bridged academic knowledge with real-world software development, applying file handling techniques to solve practical engineering problems.
- **Team Leadership & Problem-Solving:** Collaborated within a development team, breaking complex tasks into manageable components to improve workflow efficiency and consistently meet deadlines.

Certifications

Accenture iAspire – Go for Gold (Gold Level)

- Successfully completed Accenture's Go for Gold learning program and earned Gold Level certification through consistent performance and successful completion of assessments.

Database Management Essentials– Udemy

- Learned core DBMS including RDB, SQL queries, and normalization for effective data organization.
- Implemented CRUD operations while applying ACID principles in database management.

Linux Fundamental – Udemy

- Learned Linux fundamentals including distributions (Ubuntu), installation, navigation, and essential command-line operations for file and directory management.
- Gained hands-on experience in system administration, file management, and process management.
